Dimitris Koletsis,

I would like to thank you and the GPS Tracking team for having great customer service. Whenever we call or email you, you always respond quickly to our needs. The system helps us to keep our records accurate. One of the most useful functions in the system is the trips history because I can go back to any time in the past and find out what happened. For instance, I can check what my driver did 6 months ago and pull out just the record that is important to me. This way even if someone forgets the details we can always retrieve them.

We are usually very busy, so we like that basic functions of the system can be used quickly and easily. One of the things that makes it easier is the daily and weekly time-sheet reports that are very helpful. The time-sheet reports are in excel format so we can download, edit and modify them. They are also a quick way to check our driver's history and I don't even need to go into the system to get them.

The system also saves us time because has the ability to respond immediately when something happens. One of the most useful rules in the system is the unauthorised device removal rule because it lets us know when a device has been unplugged, so we can call the driver and ask him what happened and why the device has been removed. We always have good records. This way we can make sure our records are accurate.

Sincerely,

Darren Pronishen
Director

Dear Ellie,

Thank you for your help in setting up the GPS tracking system. It has helped us immensely. We were able to save a significant sum on labour costs by making the drivers more efficient. When our employees fill out their time sheets they were rounding up the time to the nearest hour at the end of the day. With the GPS we could tell exactly when they arrived at the shop at the end of the day. *This ten to fifteen minutes they were rounding daily added up to thousands of dollars per year.* We even found that a long time employee was taking some afternoons off and sitting in Tim Hortons. We were also able to monitor engine idling and by bringing this to the attention of the employees, we also saved on fuel costs. Overall, the GPS tracking system has paid for itself many times over.

We would recommend your company to anyone who would be interested in receiving great service from a GPS tracking company.

Thanks,

Stephen Ksiazek

Dear Ellie,

We have been using the GPS tracking system you provided us for a few years now. We could not be happier with the functionality of the system. It allows us to implement live-tracking of our vehicles in a hassle-free and efficient manner. The system is designed in a way that everyone in our company feels comfortable using it. We also use the reports generated by the system such as employee time-sheet report which makes life easier for our payroll department. Overall, the system has been serving us well and I am more than happy to give you the recommendation as I find the service invaluable.
